

Skimmers

Skimmers

Water leaves the pool via a skimmer, which makes the flow rate at the surface increase and suck particles on the water surface into the skimmer. These particles are collected in a strainer basket. Made of AISI 316L acid proof stainless steel.

Features

- Polished front
- Acid proof stainless steel AISI 316L
- Vertically adjustable collar
- Polished, pattern-rolled cover
- Equipped with large, high-capacity filter basket
- Connection for water level control
